

The evolution of RED

From regulation to competitive advantage

2009

2018

2021

2030

RED I

Foundation

20% renewable energy
10% transport target

RED II

Expansion

32% target
Advanced biofuels
Stricter sustainability

RED III

Acceleration

Fit for 55
Stronger requirements
Supply chain control

Where we're heading

≥42.5% renewable energy
Full traceability
Market maturity

RED is not the finish line. It's the starting point.

Most see compliance. We see what comes next.

Compliance mindset

Certification
Documentation
Minimum requirements
Market access

Connex approach

Full supply chain transparency
Verified and trusted feedstocks
Continuous sustainability control
Built for long-term reliability

**Compliance builds access. Transparency builds trust.
Control builds leadership.**
